17th September 2015

Dear Colette

iGT UNC Modification iGT056 - UPRN Provision

I am writing at the request of the iGT UNC Modification Panel following a discussion at the iGT UNC Modification Panel held on Wednesday, 16th September 2015.

Those Panel members present (Kristian Pilling, Kiran Samra, Cher Harris, Jenny Rawlinson and Kish Nundloll) expressed a unanimous view that iGT056 should be withdrawn on the basis that no progress had been made with the proposal since it was last discussed at a meeting held on the 6th June 2014. Panel members believed that it was frustrating and wasteful of industry time to keep the proposal on both the agendas of the Panel and the Workstream recognising that the industry was separately discussing the way forward with regard to address related data issues in the Address Data Working Group.

Panel members also stated that they believed that should a modification still be required once the work of this group had been finalised, it was likely that the wording and intent of the Modification would be substantially different to that currently contained in Modification iGT056.

The Panel has therefore asked whether you would consider withdrawing the Modification recognising that you or another party would raise an appropriate modification in the future assuming one is required.
.

Yours sincerely

Steve Ladle
Modification Panel Chairman
