FAO: IGT UNC Representative

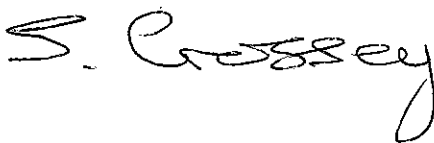

**Response to the Draft Modification Report IGT 003 – Implementation of AQ
Table resulting from 2006 IGT AQ review from Energetics Gas Ltd**

Energetics Gas fully supports the adoption of the 2006 AQ values derived from the 2006 AQ review within the IGT UNC.

It is entirely sensible that the most up to date values available should be used for both nominations and charging thereby ensuring that each IGT is running an efficient and economic pipeline system.

From the 1st October 2007, IGTs will be adopting AQ's derived from the 2005 AQ review. If these are to be replaced by the more up to date 2006 values after a short period of time, it would seem beneficial to the industry as a whole if the 2006 values should be used immediately. This would minimise the impact of system updates for both IGTs and shippers.

Yours Sincerely

Stuart Crossey
Commercial Analyst
