

iGT UNC / iGT INC Consultation Response

Date	8 th March 2012
Reference	iGT045 Modification Proposal Consultation
Title	Identification of Meter Point Supply Pressure
Respondee	Danielle Fynney
Position on the Modification	Support Modification

Facilitation of the relevant objectives

How this proposal will, if implemented, better facilitate the "code relevant objectives", as defined in Standard Condition 9 of the Gas Transporters Licence. For those answered Yes to, please provide a detailed explanation below the table.

Relevant Objective	Yes/No
a. the efficient and economic operation of the pipe-line system to which this licence relates	
b. so far as is consistent with sub-paragraph (a), the coordinated, efficient and economic operation of the pipe-line system of one or more other relevant gas transporters	
c. so far as is consistent with sub-paragraphs (a) and (b), the efficient discharge of the licensee's obligations under this licence	
d. so far as is consistent with sub-paragraphs (a) to (c) the securing of effective competition between relevant shippers and between relevant suppliers	
e. so far as is consistent with sub-paragraphs (a) to (d), the provision of reasonable economic incentives for relevant suppliers to secure that the domestic customer supply security standards are satisfied as respects the availability of gas to their domestic customers	
f. so far as is consistent with sub-paragraphs (a) to (e), the promotion of efficiency in the implementation and administration of the network code and/or the uniform network code referred to in paragraphs 2 and 5 respectively of this condition	Yes
g. so far as is consistent with sub-paragraphs (a) to (f), the compliance with the Regulation* and any relevant legally binding decisions of the European Commission and/or the Agency for the Co-operation of Energy Regulators	

* Regulation 2009/715/EC of the European Parliament and of the Council of 13 July 2009

Relevant Objectives to be better facilitated:

Likely impact on environment?

None

iGT UNC / iGT INC Consultation Response

Implementation issues including impact on your systems

Minimal

Additional Information and Comments

E.ON believes that by supporting this proposal, Pipeline Users arranging for metering work on the iGT networks will be confident about the metering point requirements and will not incur additional costs for abortive works because different requirements are needed for sites with a higher pressure.

iGT's have networks with domestic premises that have medium pressure supply points, the installation of a meter can require the use of different regulators or meter box houses and currently it cannot be determined from the Supply Point Register which sites are affected.

E.ON has noticed an increase in medium pressure installations in domestic properties; this reinforces the need for this proposal so correct premise information is gained before a visit is made.

E.ON has had recent experience of the difficulties in having the wrong information resulting in incorrect installations which has resulted in emergency call outs and aborted site visits.

By having greater visibility of the pressure at site it will facilitate the efficient roll out of SMART metering by enabling the planning process to take account of the differences in gas pressure.

Completed forms should be returned to the iGT UNC Representative, Gemserv Ltd at iGT-UNC@gemserv.com or faxed to 020 7090 1001
