

iGT UNC / iGT INC Consultation Response

Date	7 th March 2012
Reference	iGT045 Modification Proposal Consultation
Title	Identification of Meter Point Supply Pressure
Respondee	Jenny Rawlinson GTC
Position on the Modification	Do Not Support

Facilitation of the relevant objectives

How this proposal will, if implemented, better facilitate the “code relevant objectives”, as defined in Standard Condition 9 of the Gas Transporters Licence. For those answered Yes to, please provide a detailed explanation below the table.

<i>Relevant Objective</i>	<i>Yes/No</i>
a. the efficient and economic operation of the pipe-line system to which this licence relates	No
b. so far as is consistent with sub-paragraph (a), the coordinated, efficient and economic operation of the pipe-line system of one or more other relevant gas transporters	No
c. so far as is consistent with sub-paragraphs (a) and (b), the efficient discharge of the licensee's obligations under this licence	No
d. so far as is consistent with sub-paragraphs (a) to (c) the securing of effective competition between relevant shippers and between relevant suppliers	No
e. so far as is consistent with sub-paragraphs (a) to (d), the provision of reasonable economic incentives for relevant suppliers to secure that the domestic customer supply security standards are satisfied as respects the availability of gas to their domestic customers	No
f. so far as is consistent with sub-paragraphs (a) to (e), the promotion of efficiency in the implementation and administration of the network code and/or the uniform network code referred to in paragraphs 2 and 5 respectively of this condition	No
g. so far as is consistent with sub-paragraphs (a) to (f), the compliance with the Regulation* and any relevant legally binding decisions of the European Commission and/or the Agency for the Co-operation of Energy Regulators	

* Regulation 2009/715/EC of the European Parliament and of the Council of 13 July 2009

Relevant Objectives to be better facilitated:

The meter point supply pressure is already provided for within an existing process and so none of the relevant objectives will be further facilitated by this modification proposal.

Likely impact on environment?

How this proposal will, if implemented, impact on greenhouse gas emissions?

iGT UNC / iGT INC Consultation Response

None

Implementation issues including impact on your systems

This would involve system changes. GTC would therefore request a minimum of 6 months implementation should this be directed for implementation by the Authority.

Additional Information and Comments

As part of MAMcop, any third party wishing to carry out works on an IGT Network are obligated to send a GT1 form to the Network Operator at least 48 hours before work is due to commence. Part of the GT1 requests the pressure of the supply point. Therefore this information is available to the suppliers MAMs and could be passed back to the shippers.

Due to SMART Metering fast approaching, it would also be more beneficial to consider all further areas that may need to be included on the Portfolio Extract as a whole body of work. There has already recently been the addition of two new columns to the Extract and are likely to require more in the near future. By working through the future requirements cumulatively, this will reduce costly system changes.

Completed forms should be returned to the iGT UNC Representative, Gemserv Ltd at iGT-UNC@gemserv.com or faxed to 020 7090 1001
