

Consultation Response**iGT086: Central Data Services Provider –
Implementing IGT UNC changes to support
FGO**

Responses invited by: 03 May 2017

Respondent Details

Name: Gethyn Howard

Organisation: BUUK Infrastructure

Support Implementation Y

**Please briefly summarise the key reason(s) for your
support / opposition**

It is necessary to update the legal text originally developed under IGT039 to reflect the addition of FGO arrangements which will come into effect for IGTs when they utilise the services of Xoserve as the CDSP from PNID (currently 1st June). This modification is required as FGO arrangements have been developed since the SSP requirements were developed under IGT039. We are therefore supportive of this modification.

Self-Governance Statement

Do you agree with the Modification Panel's determination with respect to whether or not this should be a self-governance modification?

We believe this proposal should progress via the self-governance route as transposes the FGO arrangements over the NEXUS arrangements over the previously agreed IGT039 drafting. As the changes introduced under IGT086 are updating the IGT UNC to reflect the arrangements that have already been agreed (under UNC0565 and UNC0604S), this is effectively a house keeping change and should progress via self-governance.

Please state any new or additional issues that you believe should be considered

None identified.

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

This proposal fulfils relevant objective f) "promotion of efficiency in the implementation and efficiency of the Code" on the basis it aligns NEXUS arrangements with the FGO framework as of the Project NEXUS Implementation Date "PNID".

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

None identified.

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

This modification must be implemented at PNID which is the point that such arrangements will be used in practice.

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

Yes. The legal text has been developed in conjunction with the Code Administrator and has been reviewed by an external legal firm. The legal text was also discussed at two IGT UNC work stream meetings with a small number of additional changes made.

Further Comments

Is there anything further you wish to be taken into account?

-

Responses should be submitted by email to IGTUNC@gemserv.com
