

Consultation Response

iGT096: Corrections to the iGT083 legal text now iGT078/79 are complete

Responses invited by: 25 Apr 2017

Respondent Details

Name: Kirsty Dudley

Organisation: E.ON UK

Support Implementation ☐

Qualified Support ☐

Neutral ☒

Do Not Support ☐

Please briefly summarise the key reason(s) for your support / opposition

We support the amendments as they ensure the iGT UNC remains up to date and robust, however we still believe there is a gap in the solution (also in our iGT083 response) because Shippers are not notified of these occurrences so Shipper 1 remains initially unaware that Shipper 2 has confirmed the supply but recognise this cannot be resolved until Nexus has been implemented.

Self-Governance Statement

Do you agree with the Modification Panel's determination with respect to whether or not this should be a self-governance modification?

We agree this modification meets the Self-Governance criteria as there are no material impacts to completion or to consumers.

Please state any new or additional issues that you believe should be considered

No new issues – the issue we raised about notifications to Shipper 1 still remain outstanding.

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

Objective F will be positively impacted as it would ensure the iGT UNC remains up to date and robust.

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

Costs are as per our iGT083 response operationally but no additional costs for this housekeeping amendment.

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

We would support implementation on PNID for this modification.

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

No comments.

Further Comments

Is there anything further you wish to be taken into account?
