

Consultation Response**iGT098F: Changes to the iGT UNC Code due to changes to the UNC Code**

Responses invited by: 3rd May 2017

Respondent Details

Name: Gethyn Howard

Organisation: BUUK Infrastructure

Support Implementation Y

Please briefly summarise the key reason(s) for your support / opposition

We are supportive of this modification as it effectively acts as a sweep up to ensure that all UNC references where the IGT UNC points to the UNC remain correct and accurate, reflecting the recent changes under UNC610S.

Self-Governance Statement

Do you agree with the Modification Panel's determination with respect to whether or not this should be a self-governance modification?

We believe this is a self-governance modification as is effectively updating the legal drafting for sections of the IGT UNC that 'point' to the UNC where such references have changed as a result of UNC601S. Such changes are housekeeping changes as the UNC amendments have already been approved under the UNC self-governance route.

Please state any new or additional issues that you believe should be considered

None identified.

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

This proposal fulfils relevant objective f) "promotion of efficiency in the implementation and efficiency of the Code" on the basis it re-aligns referenced parts of the UNC where these have been amended as a result of UNC0610S.

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

None identified.

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

This modification must be implemented in line with the Project NEXUS Implementation Date (PNID) currently set for June 1st 2017. This will ensure that the IGT UNC remains coherent and fit for purpose.

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

We have reviewed and contributed to the development of the legal text and believe it delivers the intent of the modification.

Further Comments

Is there anything further you wish to be taken into account?
