Principle 13: Code Administrators will ensure cross Code coordination to progress changes efficiently where modifications impact multiple Codes

Principle description

Code Administrators will endeavour to communicate, coordinate and work with each other on modifications that impact multiple Codes to ensure changes are progressed efficiently.

Guidance on meeting the Principle

To achieve this principle Code Administrators should:

- proactively identify and discuss related cross Code changes and their impacts, by (but not limited to) seeking views from Code Panels and Workgroups.

- proactively update the Code Panels regularly on relevant cross Code changes.

- inform the Code Panels about any related cross Code changes when they make a decision on any modifications.

- have joint or back to back Workgroup meetings as much as possible on related cross Code changes.

- work together to coordinate the progression and implementation timetables of related cross Code changes.

- if practically possible, encourage representatives from other Codes to join the Workgroup meetings when there are cross Code impacts.

- if practically possible, coordinate to send a package of related cross Code changes to the Authority.

- encourage Workgroups and Code Panels to not unduly delay changes due to related cross Code changes.
