

## **Principle 13: Code Administrators will ensure cross Code coordination to progress changes efficiently where modifications impact multiple Codes**

### **Principle description**

Code Administrators will communicate, coordinate and work with each other on modifications that impact multiple Codes to ensure changes are progressed efficiently.

### **Guidance on meeting the Principle**

To achieve this principle Code Administrators should:

- seek views from Code Panels, Workgroups and market participants in order to anticipate, identify and discuss related cross code changes and their impacts.
- proactively update the Code Panels regularly on relevant cross Code changes.
- inform the Code Panels about any related cross Code changes when they make a decision on any modifications.
- proactively inform market participants when cross Code impacts are identified and seek engagement from the relevant market participants in cross Code changes.
- have joint or back to back Workgroup meetings as much as possible on related cross Code changes.
- work together to coordinate the progression and implementation timetables of related cross Code changes.
- if practically possible, encourage representatives from other Codes to join the Workgroup meetings when there are cross Code impacts.
- if practically possible, coordinate to send a package of related cross Code changes to the Authority.
- encourage Workgroups and Code Panels to not unduly delay changes due to related cross Code changes.
