Project Nexus

Data Cleansing initiative

Background

- To enable Shippers to take full advantage of their requirements specified under Project Nexus data must be in a fit state to support commercial operations
- Data Cleansing has been a topic at GT industry for a for 18-24 months
- Data items that have the potential to negatively impact the gas settlement regime have been identified and Shippers provided with individual portfolio information to aid data cleanse and update activities
- As the industry moves into the iGT Data Preparation phase some iGT supply point data will require cleansing

xserve

respect > commitment > teamwork

Background

- An informal Data Cleansing Workgroup has been created
- This meets monthly and comprises Xoserve and Shipper operational representatives
- Topics are discussed, industry level figures presented and progress towards resolution monitored
- Either this group needs to be extended to cover iGT data items or a new or existing iGT group is formed to progress the matters expected to arise
- The regular attendees at the Data Cleansing Workgroup are shown on the last slide

GT data topics relevant to iGT Data

- The following is a sub-set of the GT data cleansing topics that are likely to be relevant to iGT data, additional iGT specific data items may be identified during the iGT Data Preparation exercise.
 - Correction Factors of zero
 - Potentially incorrect Correction Factors
 - No reads for >4 years
 - No reads for > 3 years
 - No reads for > 2 years
 - Confirmed no asset
 - Read factor / units
 - Invalid meter models
- All of these data items, if incorrect, will impact the gas settlement process

GT data topics relevant to iGT Data

- In addition, Xoserve has raised at several of its CSEPs workgroups the need for completed reconciliations prior to cutover
- Xoserve shall add this topic to the iGT Data Cleansing Register
- Xoserve would welcome the iGT Shipper Workgroup views as to whether to:
 - Incorporate iGT topics within the existing Workgroup (with, if required, a summary update to the iGT Shipper Workgroup)
 - Utilise an existing iGT workgroup
 - Create a new workgroup for iGT data cleansing topics
