Please briefly summarise the key reason(s) for your support / opposition

IGT 039 modification will result in efficiencies within our processes; the Modification will remove any requirement to have separate processes for IGTs and non IGTs. This Modification will also compliment other Modification changes proposed as part of Nexus.
Self-Governance Statement
Do you agree with the Modification Panel’s determination that this should be a self-governance modification?

We agree that the Modification is not self-governance.

Please state any new or additional issues that you believe should be considered

Relevant Objectives
How would implementation of this modification impact the relevant objectives?

We agree with the Proposers view that the Modification will have a positive impact on all relevant objectives with the exception of Objective E and G

Impacts and Costs
What development and ongoing costs would you face if this modification was implemented?

Implementation
What lead time would you wish to see prior to this modification being implemented, and why?

We would suggest that this would be implemented from Nexus Go-Live.

Legal Text
Are you satisfied that the legal text will deliver the intent of the modification?
Further Comments
Is there anything further you wish to be taken into account?

We believe that it would also have been helpful to Parties if the report had provided an update of the work that the iGTs and GTs are doing on the new iGT Agency Services agreement. In addition to this we feel that the way the report has been produced makes it difficult for us to comment on the Modification and we may find that other Parties who have been even less involved will struggle.

Responses should be submitted by email to iGTUNC@gemserv.com
