

## Progress Update

**XRN 4328 : 'Report of iGT Meter Points where the confirming shipper is not the elected shipper;**

# Confirming Shipper not the Elected Shipper

---

- In August 2018, Xoserve's Data Office delivered a new report to meet requirements as outlined by XRN4328
- The report provides details on the number of Elected sites which have been Confirmed on UK Link systems by a Shipper other than the Elected Shipper
- The reports first run (July 2018) identified a single site (1) which was Confirmed by Shipper other than the Elected Shipper
- Further investigation shows that the Confirming Shipper operates under the same parent group as the Elected Shipper
- Xoserve are seeking to produce a historic report to identify all occurrences of Elected Shippers differing to Confirmed Shippers since June 1<sup>st</sup> 2017
- When this is obtained, further outputs will be shared with IGT UNC Workstream, in addition to this information being provided to the relevant Shippers
