

Consultation Response

IGT110V: Mandating the provision of NDM sample data

Responses invited by: 22 Aug 2018

Respondent Details

Name: Kirsty Dudley

Organisation: E.ON

Support Implementation ☒

Qualified Support ☐

Neutral ☐

Do Not Support ☐

Please briefly summarise the key reason(s) for your support / opposition

We support the mandating of the sample data, it will have a positive impact to the modelling.

The creation of the PAC reporting acts as a first step to monitor the data delivery, any further steps or sanctions can be developed at a later date, if required.

We support both the UNC and IGT UNC modifications.

Self-Governance Statement

Do you agree with the Modification Panel's determination with respect to whether or not this should be a self-governance modification?

We would consider the request for the data as self-governance, although it links with UIG the data doesn't influence the daily position but more ensures accuracy of the modelling. As this modification just enables a report and the monitoring of report submission we do not feel it is a material change and would support self-governance for the UNC and the IGT UNC modification.

Please state any new or additional issues that you believe should be considered

No new issues.

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

We support the relevant objectives proposed and the reasons provided as having a positive impact.

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

Low cost, costs include creation and implementation of the enduring report.

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

Around 3 months to allow for the creation of the enduring report.

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

No comments.

Further Comments

Is there anything further you wish to be taken into account?
