Please briefly summarise the key reason(s) for your support / opposition

We support the implementation of IGT111 as believe it will appropriately align permission provisions within Section K of the IGT UNC to Section V of the UNC.

This modification is a result of Review Group 003 which carried out an assessment into the current data sharing permissions via the CDSP to establish if appropriate permissions are in place. We are satisfied each permission provision has been through a comprehensive review and the recommendations outlined within the review group report are reflected within this modification.

We support enabling the CDSP to provide specific data items to Meter Asset Managers, Meter Asset Providers, Performance Assurance Framework Agreement, Energy Theft and Tip Off Service, or Theft Risk Assessment Service on behalf of the IGTs and believe this modification will better facilitate cross-code parity.
