

UNC 116:

Mod Title: Enabling permissions for the provision of information to Alt Han Company to support smart metering roll-out

Proposer: Kirsty Dudley, Eon

Panel Date: 19 September 2018

Why change

- AltHANCo is requesting access to data, governed under the UNC, to support the smart metering roll-out
- Permission to disclose the data is required before any services can be developed.

Options

- The only viable option is to amend the UNC to permit the disclosure of data to AltHANCo
- It is expected a confidentiality agreement between GTs and AltHANCo will be required to set out the permitted purpose for which the data can be used.
- A Privacy Impact Assessment will be included in the Workgroup report

Solution

- Amend iGT UNC Section K to create the permission to disclose data to AlthANCo.
- Note: This modification will be amended if 114 - Extending the data available to Suppliers under K24.3(I), is implemented. All that will be required is the need to recognise AlthANCo as a recipient of data

Recommended Steps

- The Proposer recommends that this modification should be:
 - Subject to self-governance
 - Workgroup assessment to develop the modification for 2 months.

Note: GT UNC Modification 0668 has been raised for the equivalent permission. It is recommended that a single workgroup is convened for both modifications.
