### Please briefly summarise the key reason(s) for your support / opposition

We support the implementation of this change proposal as it will ensure that the IGT UNC is effectively aligned with licence condition changes. However because of the way Brexit is developing, this is dependent on the timescales involved to account for any potential changes in these deadlines.

### **Fast Track Self-Governance Statement**

**Do you agree with the Modification Panel's determination with respect to whether or not this should be a fast track self-governance modification?**

Yes, the change proposal is seeking to maintain the alignment between the IGT UNC and licence conditions and as such should be implemented to meet the required timescales.

### **Please state any new or additional issues that you believe should be considered**

N/A.

### **Relevant Objectives**

**How would implementation of this modification impact the relevant objectives?**

We feel that Relevant Objectives F and C are better achieved by this change as it will ensure continued consistency of the IGT UNC.

### **Impacts and Costs**

**What development and ongoing costs would you face if this modification was implemented?**

There are no impacts or costs foreseen by this change as it is primarily of a housekeeping nature to ensure that the code is updated to take into account political developments.

### **Implementation**

**What lead time would you wish to see prior to this modification being implemented, and why?**

Depending on any further extensions or change in dates of the proposed leaving of the EU, it is agreed that the proposed implementation is suitable. Naturally though if political developments alter this ate requirement then so will the release of this change proposal.

### **Legal Text**

**Are you satisfied that the legal text will deliver the intent of the modification?**

The proposed legal text is sufficient for the purpose of the modification.

**Further Comments**
