Do Not Support ☐

Please briefly summarise the key reason(s) for your support / opposition

We support the implementation of this change proposal because it will ensure consistency across the codes in the wake of a portion of MDD migrating between codes. Therefore, that is why 'qualified support' is given to this change because it is on the assumption that the other associated changes (SCP467, UNC 0682 and XRN4851) are also going to be implemented at the same time.

Self-Governance Statement

Do you agree with the determination with respect to whether or not this should be a self-governance modification?

Yes, the core discussions have taken place outside of the IGT UNC with merely the need to update the code for consistency across the industry.

Please state any new or additional issues that you believe should be considered

N/A.

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

We agree that Relevant Objective F is better achieved by this change as it will improve the efficient use of the IGT UNC as the CSS gets implemented.

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

There are no impacts or costs foreseen by this change with key process changes etc occurring through other codes, such as the DTC.

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

We agree with the proposed implementation date of the change as this will align with the other codes and associated changes.

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

Following the discussions within the IGT UNC Modification Workstream we agree that the proposed legal text is sufficient for the purpose of the modification.

Further Comments

Is there anything further you wish to be taken into account?

N/A.
