

Consultation Response

IGT144: Ability to Reflect the Correct Customer Network Use and System Offtake Quantity (SOQ) During COVID-19

Responses invited by: 26 05 2020

Respondent Details

Name: Claire Roberts

Organisation: ScottishPower

Support Implementation ☐

Please briefly summarise the key reason(s) for your support

We support the principle of the change, as it is the right thing to do given the current situation where businesses are being impacted by the Covid-19 restrictions i.e. discontinued or reduced usage or increased usage due to being classed as an essential business.

This change will allow shippers to submit accurate SOQs which in turn will result in accurate charging.

Self-Governance Statement

Do you agree with the Modification Panel's determination with respect to whether or not this should be a self-governance modification?

We support an Authority decision due to this being raised as an urgent change. We would expect the Authority to make a decision on both the UNC and IGT UNC so they align.

Please state any new or additional issues that you believe should be considered

None Identified

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

We agree the modification will have a positive impact on the relevant objectives a and d

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

None Identified

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

If approved, implementation could be immediately, with both the IGT UNC and UNC dates aligned

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

No comment

Further Comments

Is there anything further you wish to be taken into account?

No further comments

Responses should be submitted by email to IGTUNC@gemserv.com
