

Summary of IGT UNC Workgroups – 8th October 2020

Purpose:

This paper provides Panel members with a summary of IGT UNC Workgroup discussions where applicable each month.

Please note that the Modifications which will be subjected to a decision at this meeting are not reflected in this document due to them already being discussed in the Panel meeting.

[IGT132 – Introduction of IGT Code Credit Rules](#)

The Workgroup were presented with the amended modification proposal and given the opportunity raise any further comments regarding the new changes to be feedback to the proposer. The Workgroup noted one question re the definition of days in the working example. This will be fed back to the Proposer to address prior to the next Workgroup meeting.

- Next steps: Workgroup are to develop a Workgroup report at their next meeting.

[IGT138 – Performance Assurance Techniques and Controls](#)

The Workgroup were provided with an update concerning the progression of the equivalent UNC Modification UNC0674 which has had a further version submitted to the Joint Office and is due to be published imminently (v15). and the Workgroup were informed that an amended version of the IGT UNC Modification would soon be published along with the legal text. The Workgroup were advised that following discussions with the Proposer of IGT138 it was agreed that the Modification would need further revisions beyond the UNC equivalent changes. This is due to a lack of foundation in the IGT UNC on Performance Assurance. Although the IGT UNC points over to the Performance Assurance schedules in the UNC, it does not have some of the fundamental definitions and frameworks for IGT138 changes to be overlaid. The Code Administrator has therefore resolved to hold an additional meeting on Thursday 5th November 2020 to give the industry and opportunity to view the new amendments to IGT138 and the proposed legal text before the November Workstream meeting, where the Workgroup Report for this Modification will be completed. This is in order to track alongside UNC674 and ensure that Ofgem can return a decision on both Modifications together.

The Workgroup were advised to join the last UNC0674 Workgroup meeting to be involved in its development as that will be the last opportunity to feed in their thoughts before the Workgroup reports are finalised.

- Next steps: The Workgroup are to review the amended IGT UNC Modification and the legal text before developing a Workgroup report.

[Cross-Code Modifications implications](#)

The Workgroup heard updates re the following UNC Modifications (see [here](#) for detailed discussion);

- UNC710
- UNC734
- UNC736/A
