

Summary of IGT UNC Workgroups –10th June 2021

Purpose:

This paper provides Panel members with a summary of IGT UNC Workgroup discussions where applicable each month.

Please note that the Modifications which will be subject to a decision at this meeting are not reflected in this document due to them already being discussed in the Panel meeting.

[IGT145 –Transfer of Sites with Low Valid Meter Reading Submission Performance from Classes 2 and 3 into Class 4](#)

The Workgroup heard that UNC0664V (Transfer of Sites with Low Valid Meter Reading Submission Performance from Classes 2 and 3 into Class 4) had been raised as a subsequent variant to UNC0664, the UNC equivalent to IGT145.

The proposer noted that the variation request for UNC0664V would be sent to the UNC Panel and would be proposed as Self-Governance rather than for Authority Decision. It was highlighted that the legal text in IGT145 directed to the UNC and whilst this would not need changing, the Modification would need further work so would be brought back to the July Workstream meeting.

The Chair noted that the Modification had stated that it would change parts of the IGT UNC, however they did not think this would still be applicable so the Code Administrator would revise the legal drafting.

The proposer stated that, when they had looked at the legal text, IGT145 pointed to the UNC at a clause level and the UNC Clauses would be changing therefore they would redraft the Modification prior to the next Workstream meeting on 8th July 2021.

For a full extract of the discussion please refer to the Draft minutes [here](#).

[IGT154 – Introducing the concept of a derogation into the IGT UNC for Net Zero innovation project](#)

The proposer advised that the majority of the changes that had been made to IGT154 were in order to be consistent with UNC0760, which has changed substantially.

It was noted that the biggest change was structural following feedback from Shippers that there should be derogations for things other than Net Zero derogations. The proposer stated that IGT154 would introduce the concepts for other innovation projects.

The Workgroup heard that at the UNC Governance Workstream, it had been discussed that a change to the Code would give greater transparency to parties and if the was material then the Modification could be sent to Ofgem for decision.

For a full extract of the discussion please refer to the Draft minutes [here](#).

Cross-Code Modification Implications Tracker

The following cross-code Modifications were highlighted to the Workgroup:

- **UNC0769 - Adding Local Authorities as a new User type to the Data Permissions Matrix**
- **UNC0746 - Application of Clarificatory change to the AQ amendment process within TPD G2.3 from 1st April 2020**
- **UNC0734S - Reporting Valid Confirmed Theft of Gas into Central Systems**
- **UNC0674 - Performance Assurance Techniques and Controls**
- **UNC0710 - CDSP provision of Class 1 read service**

For a full extract of the discussion please refer to the Draft minutes [here](#).
