

Consultation Response

IGT0138v: Performance Assurance Techniques and Controls

Responses invited by: 23 May 2022

Respondent Details

Name: Claire Louise Roberts

Organisation: ScottishPower

Support Implementation

Please briefly summarise the key reason(s) for your support

ScottishPower is in support of implementation of IGT138v, this change seeks to introduce a Performance Assurance regime into IGT UNC to align with the changes being introduced as part of UNC 0674v.

Modification UNC 0674v seeks to **address weaknesses in Performance Assurance that allows Settlement errors to persist uncorrected.**

Accuracy of RAQs, FYAQS and therefore cash-out and transportation charges, reducing uncertainty and therefore lowering bills is potentially improved by the more reads entering Settlement.

Self-Governance Statement

Do you agree with the Modification Panel's determination with respect to whether or not this should be a self-governance modification?

We agree this modification should be considered by the authority in line with UNC Modification 0674v.

Please state any new or additional issues that you believe should be considered

None

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

ScottishPower's view is implementation of this modification would have a positive impact on both relevant objective (d) & (f).

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

ScottishPower does not expect to incur any direct costs beyond what would be required to comply with UNC obligations.

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

As stated in our last response, implementation of IGT138 has a dependency on UNC Modification now "0674v" being implemented.

We would support an implementation date that aligns both IGT & UNC being delivered at the same time. IGT UNC have worked hard to keep this modification in line with the UNC modification timetable so they could be considered together.

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

Yes, we agree the legal text will deliver the intent of the modification.

Further Comments

Is there anything further you wish to be taken into account?

None

Responses should be submitted by email to IGTUNC@gemserv.com
