Dear Sir or Madam,

Re: IGT160 – Introducing the concept of a derogation into the IGT UNC for innovation projects

Thank you for the opportunity to provide representation on the above noted Modification Proposal. Please find below Northern Gas Network's (NGN) comments in respect of this change.

NGN supports this Modification Proposal.

As proposer of the linked UNC modification, 0800 Introducing the concept of a derogation framework into Uniform Network Code (UNC) (Authority Direction), I offer support for this IGT UNC modification proposal:

This proposal should allow derogations, and specifically Net Zero Innovation Use Case derogations, to be applied for under UNC and, where approved, to automatically apply to the IGT UNC. This should allow relevant IGT sites to be easily included, from a governance perspective, in trials and projects relating to Net Zero Innovation.

I hope these comments will be of assistance and please contact me should you require any further information in respect of this response.

Yours sincerely,

Tracey Saunders (via email)
