Please briefly summarise the key reason(s) for your support / opposition

In the event of a misalignment of UKLink and CSS data, this mod will support the resolution of billing to correct parties and help maintain efficient running of switches

Self-Governance Statement

Do you agree with the Modification Panel's determination with respect to whether or not this should be a self-governance modification?

Agree. Although it is affecting supplier payments, it is actually ensuring correct allocation to support competition when erroneous mis-matches with UKLink and CSS may occur (albeit rarely)

Please state any new or additional issues that you believe should be considered

None

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

We support both objectives given (Improved safety and reliability & Improved quality of service) for the reasons given in the Mod.

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

No costs are likely applicable for the introduction for this mod as these are already included within XOperate mod XRN5567 as described within this mod proposal. However there could be administrative costs to Shippers/GDN/IGTs if this mod does not go through to manually arrange correct allocation of costs

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

As the differences between UKLink and CSS cannot be foreseen (due to P1 incidents eg.) recommendation is that this implementation be as soon as practicable.

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

Yes. No further comments.

Further Comments

Is there anything further you wish to be taken into account?

None
