Please briefly summarise the key reason(s) for your support / opposition

IGT176 has been subject to comprehensive discussions at the IGT UNC workstream, and has consequently developed at a good pace, reflective of the discussions held. The Modification is now in a place which marries itself to UNC0887. With this in mind, we support implementation of IGT176.

Self-Governance Statement

Do you agree with the Modification Panel's determination with respect to whether or not this should be a self-governance modification?

We agree that the Modification should mirror its UNC Modification (UNC0887) in being subject to Authority Decision. We are also supportive of IGT176 being considered by the Authority concurrently with UNC0887.

Please state any new or additional issues that you believe should be considered

What development and ongoing costs would you face if this modification was implemented?

No costs associated with IGT176.

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

IGT176 should only be implemented if UNC0877 is successful in being implemented. This will ensure the Modification meets its intention of marrying UNC0887.
