

Summary of IGT UNC Workgroup – 8th January 2026

Purpose:

This paper provides Panel members with a summary of IGT UNC Workgroup discussions each month. Please note that any Modification(s) subject to review at this Panel meeting are not reflected in this document due to them already being on the Panel agenda. For a full extract of the discussion please refer to the Draft minutes which are available [here](#).

IGT UNC Modifications:

[RG008 - IGT UNC Code Review in preparation for Code Manager and Code Consolidation](#)

The Workgroup agreed on the approach for the new Review Group. Meetings will be held during standard IGT UNC Workgroup meetings to begin, with it being agreed that the Code Administrator can arrange separate meetings where it is deemed to be required. The Review will be split up into two phases. The first phase will focus on IGT specific nuances that are not covered or governed differently in the UNC. The other phase phases will focus on identifying housekeeping errors and validating all the current cross-referencing to the UNC in the IGT UNC Code.

The Workgroup agreed to a virtual page turning approach for phase two. The scope of the Review includes the main IGT UNC Code, and all ancillary, guidance and process documents, and templates but not current or future governance arrangements unless necessary. The agreed outputs were a final Review Report to be issued to Panel, along with any necessary draft Modifications for consideration. Regular updates will also be provided to Panel. Any interested party is welcome attend the Review Group meetings. The Review Group will commence at the February Workgroup meeting.

Please note that an updated version of the Review Proposal is being agreed with the Proposer and will be made available to industry for transparency when available.
