

Summary of IGT UNC Workgroup – 12th February 2026

Purpose:

This paper provides Panel members with a summary of IGT UNC Workgroup discussions each month. Please note that any Modification(s) subject to review at this Panel meeting are not reflected in this document due to them already being on the Panel agenda. For a full extract of the discussion please refer to the Draft minutes which are available [here](#).

IGT UNC Modifications:

[RG008 - IGT UNC Code Review in preparation for Code Manager and Code Consolidation](#)

Following discussion – and in line with phase one activities as part of the review approach agreed previously – it was agreed that the next meeting of the Review Group would focus on the collaborative review of Part CI (Supply Points), with the aim of identifying IGT-specific provisions in advance of that meeting, and the Code Administrator to maintain a shared tracker spreadsheet to log findings and facilitate the ongoing review. Further meetings of the Review Group would focus on additional Parts of the IGT UNC, and the explicit order of the Parts in scope of examination would be identified during the next meetings.

[CSL01 - Exclusion of Standalone Networks from IGT UNC](#)

Harry Davis (HD) (CNG Services Limited (CSL)) provided a presentation to the Workgroup giving an overview of the Modification as well as some additional context. There were a number of questions raised during the meeting, including whether the suggested changes would establish significant precedents and could require Licensing changes instead of an IGT UNC Modification and queried if Ofgem had provided feedback on CSL01. Other questions raised were surrounding the involvement of external Shippers on the standalone network, and whether proper competition could be established on the network. The Proposer agreed to take away some of the questions raised and bring back answers to the March Workgroup. The Code Administrator also took an action to engage with Ofgem over CSL01.

[IGT180 - CDSP Obligations required for the introduction of the Gas Shipper Obligation](#)

The scheduled first joint Workgroup between the UNC and IGT UNC to discuss IGT180 and [UNC 0922](#) on 12th February was cancelled following the delay in publication of the Government policy papers on the new Gas Shipper Obligation. The first joint Workgroup meeting is scheduled for 12th March between 9:30 – 11:30, with the standard IGT UNC March Workgroup meeting to commence at 12:00 on the same day.
