

Summary of IGT UNC Workgroup – 12th March 2026

Purpose:

This paper provides Panel members with a summary of IGT UNC Workgroup discussions each month. Please note that any Modification(s) subject to review at this Panel meeting are not reflected in this document due to them already being on the Panel agenda. For a full extract of the discussion please refer to the Draft minutes which are available [here](#).

IGT UNC Modifications:

[RG008 - IGT UNC Code Review in preparation for Code Manager and Code Consolidation](#)

In line with the phase one activities agreed previously, the Review Group completed a collaborative review of Part CI (Supply Points), with the aim of highlighting IGT-specific provisions (nuances) that parties had identified in advance of the meeting. Some of the nuances identified included Shared Supply Points, Annual Quantity, defined terms and ancillary documents that do not exist under the UNC. There was also discussion on CSS Supply Points, with the Workgroup agreeing that while it is a nuance for now, [IGT176 - Changes to IGT UNC to enable UNC0887 'Facilitating Bi-Directional Connections Between IGT Pipelines and the NTS](#) proposes the introduction of non-CSS Supply Points into the IGT UNC. It was agreed that the next meeting of the Review Group would focus on the collaborative review of Part CII and CIII.

[IGT181 - Revision of Virtual Last Resort User and Contingent Procurement of Supplier Demand Event Triggers](#)

Catherine Fearon (ES Pipelines) and Kathryn Adeseye (Xoserve) introduced the Modification to the Workgroup. IGT181 seeks to mirror [UNC0854](#) and proposes introducing a User Premises Termination Notice (UPTN) into the IGT UNC, enabling suspension of a sanctioned User's registration, activation of Supplier undertakings and use of the Virtual Last Resort User (VLRU) and Contingent Procurement of Supplier Demand (CPSD) mechanisms. The Workgroup expressed initial support for IGT181 being subject to an Authority Decision, citing the recent geopolitical events in the Middle East. The Workgroup were taken through the Business Rules and agreed to discuss these in further detail at the April Workgroup meeting.

[IGT180 - CDSP Obligations required for the introduction of the Gas Shipper Obligation](#)

Please note that the re-scheduled first joint Workgroup between the UNC and IGT UNC to discuss IGT180 and [UNC0922](#) was cancelled following a delay in the publication of required Government policy papers on the new Gas Shipper Obligation.
