

Summary of IGT UNC Workgroup – 14th May 2026

Purpose:

This paper provides Panel members with a summary of IGT UNC Workgroup discussions each month. Please note that any Modification(s) subject to review at this Panel meeting are not reflected in this document due to them already being on the Panel agenda. For a full extract of the discussion please refer to the Draft minutes which are available [here](#).

IGT UNC Modifications:

[RG008 - IGT UNC Code Review in preparation for Code Manager and Code Consolidation](#)

In line with the phase one activities agreed previously, the Review Group completed a collaborative review of Parts CIV and CV, with the aim of highlighting IGT-specific provisions (nuances) that parties had identified in advance of the meeting. Some of the nuances identified some differences in definitions from the UNC equivalents and a provision on how IGTs operate within a pre-agreed capacity set by GDNs. Discussions were also held on some clauses from the equivalent sections of the UNC that have been omitted from the IGT UNC as they concerned non-CSS Supply Points, which will need to be reviewed as IGT176 will introduce non-CSS Supply Points into the IGT UNC. It was agreed that the next meeting of the Review Group would focus on the collaborative review of Part L (Modification Rules).

[IGT180 - CDSP Obligations required for the introduction of the Gas Shipper Obligation](#)

Please note that the re-scheduled first joint Workgroup between the UNC and IGT UNC to discuss IGT180 and [UNC0922](#) was cancelled following a delay in the publication of required Government policy papers on the new Gas Shipper Obligation.
