

Summary of IGT UNC Workgroup – 13th August 2026

Purpose:

This paper provides Panel members with a summary of IGT UNC Workgroup discussions each month. Please note that any Modification(s) subject to review at this Panel meeting are not reflected in this document due to them already being on the Panel agenda. For a full extract of the discussion please refer to the Draft minutes which are available [here](#).

IGT UNC Modifications:

[RG008 - IGT UNC Code Review in preparation for Code Manager and Code Consolidation](#)

In line with the phase one activities agreed previously, the Review Group completed a collaborative review of Part O (Derogations) and the Derogations Guidance Document with the aim of highlighting IGT-specific provisions (nuances) that parties had identified in advance of the meeting. There were several differences highlighted between the IGT UNC and UNC on both the Derogations rules and current guidance. Even though there has never been a derogation under the IGT UNC, the Workgroup determined that the current process was still fit for purpose. It was agreed that the next meeting of the Review Group would focus on the collaborative review of Part K, Clauses 1-23, and would also review BUUK's analysis of Part M ahead of the meeting.

[RG009 – Introduction of Qualification Requirements for new Shippers](#)

RG009 is being progressed collaboratively in a joint UNC-IGT UNC Review Group alongside [UNC 0938](#), with support from the Performance Assurance Framework Administrator (PAFA) and engagement from the Performance Assurance Committee (PAC). It was noted that any qualification requirements are expected to be aligned across both Codes, particularly in light of ongoing Code Reform. The Review is expected to continue for around a year, with separate but closely aligned reports produced for each Code. Ofgem is aware of and supports the Review, and IGT UNC parties, especially Shippers, were encouraged to participate in future meetings, with the next meeting scheduled for 15 September.
