

Final Modification Report		At what stage is this document in the process?
IGT184: RG008 Housekeeping: Parts CI-CV, L, O, and IGT UNC Derogations Guidance		01 Modification 02 Workgroup Report 03 Draft Modification Report 04 Final Modification Report
Purpose of Modification: The purpose of this Modification is to correct housekeeping errors within the IGT UNC Parts CI-CV, L, O, IGT UNC Derogations Guidance which have been reviewed as part of RG008 - IGT UNC Code Review in preparation for Code Manager and Code Consolidation .		
	Panel considered IGT184 on 25th September 2026 . The Panel unanimously agreed that this Fast Track Self-Governance Modification Proposal should be implemented.	
	High Impact: N/A	
	Medium Impact: N/A	
	Low Impact IGT UNC, and IGT UNC Parties.

1 Summary

What

Multiple errors within the IGT UNC have been identified and logged as part of the work being completed under RG008. All the errors within scope of this Modification can be considered housekeeping (spelling mistakes, double spaces etc.). The errors identified and included in this Modification are in the following Parts of Code:

- Part CI – Supply Points
- Part CII – DM Capacity and Offtake Rate
- Part CIII – Interruptible Supply Points
- Part CIV – Supply Point Deregistration and Isolation
- Part CV – New Supply Meter Points and Other Siteworks
- Part L – Modification Rules
- Part O – Derogation Rules

IGT UNC Ancillary Documents:

- IGT UNC Innovation Derogations Guidance

Why

Rectifying these errors will ensure that Code is correctly maintained, allowing Code Parties to interpret Code as intended. This Modification will also assist RG008 in its preparation of Code ready for Code Consolidation and Code Manager.

How

The Modification will look to correct the logged housekeeping changes that have been found in Parts CI-CV, L, and O.

2 Governance

Justification for Fast Track Self-Governance procedures

We believe that the Modification should be subject to Fast Track Self-Governance, as the Modification:

- a. would meet the self-governance criteria; and
- b. is properly a housekeeping Modification required because of some error or factual change, including but not limited to:
 - i. updating names or addresses listed in the uniform network code;
 - ii. correcting minor typographical errors;
 - iii. correcting formatting and consistency errors, such as paragraph numbering; or
 - iv. updating out-of-date references to other documents or paragraphs.

Prioritisation Criteria

Prioritisation Criteria	High Impact
Strongly aligns with the Strategic Direction Statement The Modification strongly supports key government energy policy actions that require immediate progress and aligns with SDS priorities under the Act Now category.	N/A
Complexity The Modification is highly complex, with a fast-approaching deadline, significant implementation challenges, and a requirement for extensive stakeholder engagement.	N/A
Importance The Modification addresses a high-risk or critical issue, making timely action important for stakeholders as it is anticipated to deliver substantial benefits and value.	N/A
Priority Category	N/A

No prioritisation is needed, reflecting the Ofgem decision to exclude Fast-Track Self-Governance Modifications, as well as Urgent Modifications, from the prioritisation process.¹

Requested next steps

This Modification should:

- be subject to Fast Track Self-Governance.

Panel discussions and conclusions (September 2026)

The Panel considered the Proposer's views regarding governance route and prioritisation.

The Panel unanimously agreed that IGT184 meets the Fast Track Self-Governance Criteria and should be progressed as such. It should be noted that, as a result, prioritisation procedures do not apply.

3 Why Change?

RG008 intends to correct errors within the IGT UNC to ensure that the Code itself is in the best format and condition for Code Consolidation and the arrival of the Gas Network Code (GNC) Code Manager. In the short term however, correcting these errors will ensure that Parties to the Code are able to interpret Code as intended, as errors in the Parts listed will be rectified. This Modification seeks to support the work on RG008 by making necessary housekeeping changes to Code identified thus far.

5 Solution

Summary

In summary, the solution is to correct errors that are housekeeping in nature and that have been identified as part of the work completed within RG008. Examples of these errors include correcting spelling errors, formatting errors, and other minor errors identified along the way.

The realised solution can be located within the proposed legal text published on the [IGT184 webpage](#). The errors identified and included in this Modification are in the following Parts of Code:

- Part CI – Supply Points
- Part CII – DM Capacity and Offtake Rate
- Part CIII – Interruptible Supply Points
- Part CIV – Supply Point Deregistration and Isolation
- Part CV – New Supply Meter Points and Other Siteworks
- Part L – Modification Rules
- Part O – Derogation Rules

The solution also includes an IGT UNC Ancillary Document in the form of the IGT UNC Innovation Derogations Guidance.

Panel discussions and conclusions (September 2026)

The Panel were provided with an overview of the IGT184 solution, including the nature of the changes identified, confirmation that the changes were discussed as part of the work being completed under RG008 and the areas of Code within scope of this Modification. The Panel had no comments or concerns with regards to the solution.

6 Impacts & Other Considerations

Does this Modification impact a Significant Code Review (SCR) or other significant industry change projects, if so, how?

None.

Consumer impacts

What is the current consumer experience?

None.

What would the new consumer experience be?

None.

Impact of the change on Consumer Benefit Areas

Area	Identified Impact
Improved safety and reliability.	None
Lower bills than would otherwise be the case	None
Reduced environmental damage	None
Improved quality of service	None
Benefits for society as a whole	None

Cross-Code impacts

There are no cross-Code impacts, as this Modifications looks at only correcting housekeeping errors in the IGT UNC.

UNC	☐
REC	☐
Other	☐
None	☒

Environmental impacts

No environmental impacts with this housekeeping change.

Panel discussions and conclusions (September 2026)

The Panel were provided with an overview of the impacts section above and advised that there were no impacts identified by the Proposer.

The Panel considered the impacts of IGT184 and unanimously agreed that there would be no impacts on any SCRs or significant industry change projects, consumers, other industry Codes or the environment.

7 Relevant Objectives

Impact of the Modification on the Relevant Objectives:

Relevant Objective	Identified impact
(A) Efficient and economic operation of the pipe-line system	None
(B) Co-ordinated, efficient and economic operation of (i) the combined pipe-line system; and/or (ii) the pipe-line system of one or more other relevant gas transporters	None
(C) Efficient discharge of the licensee's obligations	None
(D) Securing of effective competition: (i) between relevant shippers; (ii) between relevant suppliers; and/or (iii) between DN operators (who have entered into transportation agreements with other relevant gas transporters) and relevant shippers	None
(E) Provision of reasonable economic incentives for relevant suppliers to secure that the domestic customer supply security standards... are satisfied as respects the availability of gas to their domestic customers	None
(F) Promotion of efficiency in the implementation and administration of the Code	Positive
(G) Compliance with the Regulation and any relevant legally binding decisions of the European Commission and/or the Agency for the Cooperation of Energy Regulators	None

Proposer's views against Relevant Objective (F)

This Modification inherently has a positive impact on Relevant Objective (F). Its correction of errors within the Code will help promote efficiency in the implementation and administration of the Code, as Code Parties will be able to interpret Code as intended.

Panel discussions and conclusions (September 2026)

The Panel were provided with an overview of the positive impacts to Objective (F) identified by the Proposer.

The Panel considered the Proposer's views and unanimously agreed that this Modification will have a positive impact on Objective (F) as set out above.

8 Implementation

Approved implementation approach

The Proposer initially recommended that this Fast Track Self-Governance Modification Proposal be implemented 1 Working Day following the closure of the 15 Working Day Appeal Window.

The Panel approved an implementation date for IGT184 of:

- 6th November 2026 (as part of the November 2026 Release).

Panel discussions and conclusions (September 2026)

The Panel were provided with an overview of the proposed implementation approach. The Code Administrator advised that if this Modification was approved on 25th September the Modification would be implemented on 19th October 2026. The Panel were asked to consider whether they were happy with this approach or if they would rather push the implementation to the November 2026 Release, which is currently empty. The Code Administrator noted that the November 2026 Release would go live on Friday 6th November 2026.

One Panel member (the Proposer) advised that they were not wedded to either implementation date and were happy to go with the view of the other Panel members. Another member added that they had no issue with this Modification being implemented as part of an Extraordinary Release but did feel that implementing Modifications as part of a scheduled releases is generally good practice. They therefore suggested that IGT184 be implemented as part of the November 2026 Release. Another Member agreed with this view.

The Panel considered the options for implementation and unanimously agreed that this Modification should be implemented on 6th November as part of the November 2026 Release.

9 Legal Text

Text commentary

The proposed legal text for this Modification can be found on the [IGT184 webpage](#).

Panel discussions and conclusions (September 2026)

The Panel were provided with an overview of the draft legal text changes.

The Panel unanimously agreed that the legal text was fit for purpose and delivered the intent of the Modification.

10 Recommendations

Panel Determinations

The Panel considered the IGT184 Final Modification Report (FMR) and unanimously agreed:

- that IGT184 does not have an impact on any SCRs or other industry projects;
- that IGT184 is a Fast Track Self-Governance Modification Proposal;
- that Impacts and costs set out in the report are accurate and appropriate;
- that IGT184 will have a positive impact on Objective (F);
- with the revised implementation approach; and
- that the IGT184 legal text delivers the intent of the Modification.

The Panel unanimously agreed that:

- IGT184 should be approved.

Further discussion with regards to Panel decisions can be found in the relevant sections of this FMR.
