Summary of IGT UNC Workgroup – 12th November 2026

Purpose:

This paper provides Panel members with a summary of IGT UNC Workgroup discussions each month. Please note that any Modification(s) subject to review at this Panel meeting are not reflected in this document due to them already being on the Panel agenda. For a full extract of the discussion please refer to the Draft minutes which are available here.

IGT UNC Modifications:

RG008 - IGT UNC Code Review in preparation for Code Manager and Code Consolidation

Due to low attendance numbers at the November IGT UNC Workstream meeting, including no Shippers being present, the Chair decided to defer the review of Parts N and P to the December Workstream meeting.

RG009 – Introduction of Qualification Requirements for new Shippers

A joint meeting was held for UNC 0938R - Introduction of Qualification Requirements for new Shippers and RG009 on 12th November 2026. At this meeting the Review Group continued its review and assessment of the requests. The group considered the following:

- Updated qualification topics, which had been further expanded following feedback at the previous Review Group meeting (see slides for further detail).
- An update on the comparison between Ofgem licensing requirements and assurance frameworks within other Energy Codes.
- Possible approaches to qualification and the assessment of a new Shipper's reediness.

Next steps are for TALAN and the Performance Assurance Framework Administrator (PAFA) to begin developing a first draft of the proposed assurance methodology, taking into account any Review Group feedback on qualification topics, the relationship between existing licensing requirements and the preferred assessment approach.

The next meeting is expected to be held on 15th December 2026 at 14.30.
